

**ACM and Fire Safety Exclusion**

**We** will not indemnify **You** against anything arising directly or indirectly from or relating to:

1. any cladding system or cladding materials consisting in whole or in part of Aluminium Composite Material; and / or
2. the combustibility or fire protection performance of all façade materials (including but not limited to external cladding to include associated core, filler and insulation, signage and insulation), glazing, doors, external wall system and/or internal wall system of any building or structure; and / or
3. **Fire Safety Claims.**

The following Definitions shall apply for the purposes of this exclusion

**Aluminium Composite Material** shall mean a type of panel that consists of two aluminium sheets bonded to a non-aluminium core

**Fire Safety Claims** shall mean **Claim** or **Circumstance** arising directly or indirectly from or in any way related to the fire safety of a building or structure, including but not limited to;

- fire compartmentation
- fire prevention or suppression
- the adequacy of fire escapes or means of escape
- the means of detection and warning
- any advice related to evacuation procedures
- any design or advice relating to fire spread via the “leapfrog effect”
- any design, advice or specification related to a building’s compliance with applicable rules and regulations governing fire safety
